

Glatz Contract

Project business from A-Z

Glatz supports you in creating places where people get together

Superior sun protection with splendid radiance

The architectural demands on the outdoor areas of hotels and restaurants, public spaces, universities, leisure facilities and elegant estates require a wealth of imagination and specialist knowledge.

It is therefore worthwhile to discuss the approach to shading with our specialists at an early stage. The lasting message evoked by the right parasols is increasingly becoming a hallmark for outdoor locations.

A holistic shade solution requires quality from the first step to the last. Whether for planning, design, product development or project-specific individual solutions made to measure: we always strive for top performance when it comes to reliable sun protection for outdoor areas.

The Glatz project department has been committed to straightforward dialogue with national and international customers for years. Alongside sales partners, it assists architects, planners, interior designers, engineers, restaurateurs and hoteliers in their search for optimal shade solutions.

As the manufacturer, we support you with our many years of experience and consulting expertise, with innovative ideas, full technical support and our typical Swiss perfectionism. Welcome!

Do you want to get directly in touch with the manufacturer?

Please do not hesitate to call us.
