

Parasols for Cities and Public Spaces

Urban sun protection with character

Cities are increasingly affected by so-called “heat islands”: dense urban structures, lack of greenery and traffic cause urban areas to heat up by up to 10 degrees more than their surrounding regions.

Urban planners are therefore looking for innovative solutions to temporarily cool public spaces while creating a harmonious cityscape for surrounding restaurants and cafés.

Glatz offers flexible solutions and holistic concepts for this purpose – parasols that not only provide shade and cooling, but also shape the urban environment and add a distinctive, stylish character.

« *We create places where people feel comfortable.* »

Highest quality & durability

Glatz parasols are built to withstand the demands of everyday life. Manufactured from premium, corrosion-resistant materials and wind-tunnel tested for stability up to 120 km/h, they remain stable and reliable even in strong winds.

Quick & easy handling

Every second counts, efficient and safe workflows are essential. Our parasols are quick and easy to operate, giving you more time for what truly matters. Our patented opening systems allow rapid opening and closing with just a few turns of the crank or using the tensioning lever.

Variety that inspires

Round or square, understated or colourful – with over 70 fabric designs, various frame colours and a uniquely wide range of sizes, you will find the parasol that perfectly complements your architecture and environment. Every detail counts. The innovative LED lighting and the wide range of secure fixation solutions impresses with both safety and aesthetics.

Tailor-made solutions

More shade means more tables and more guests. If your outdoor area requires custom-made solutions for optimal shading, Glatz designs and manufactures special formats from its large parasol range that fit with absolute precision. Glatz is the partner that makes the seemingly impossible possible.

Glatz concrete cube

No excavation work, no foundations, but 100% stability and flexibility. The new Concrete Cube offers a stylish and practical solution for urban spaces:

- Multifunctional and relocatable fixation solution
- Seat made of spruce, colourless pressure-impregnated
- 1,100 kg total weight replaces the mechanical anchoring in the ground and guarantees the wind stability specified by Glatz for all parasol sizes up to Ø 600 / 550 x 550 cm

Glatz – your expert partner

For years, the Glatz project team has been committed to straightforward dialogue with national and international clients. We support architects, planners, interior designers, engineers, restaurateurs and hoteliers in selecting the ideal shading solution.

The Glatz product range impresses with its exceptional variety and offers a tailored solution for every situation.

Let us rethink your outdoor space together. We are happy to advise you personally – customised, solution-oriented and with an eye for every detail.
