

Parasols for nurseries and schools

Safety and privacy for our youngest

Whether it's letting off steam in the schoolyard or focused learning in the fresh air: Children need a place where they feel safe and comfortable. The right sun protection plays a key role in creating that environment.

Parasols from Glatz provide exactly these kinds of spaces – safe, stylish, and tailored to the needs of educational institutions. [glatz.com](https://www.glatz.com)

tested by the wind. »*

Highest quality & durability

Glatz parasols are built to withstand the demands of everyday life. Manufactured from premium, corrosion-resistant materials and wind-tunnel tested for stability up to 120 km/h, they remain stable and reliable even in strong winds.

UV protection & health

Glatz uses tested high-tech polyacrylic sun protection fabrics that protect people of all ages from direct sunlight and harmful UV radiation. The fabric ensures maximum UV protection of more than 98%.

Quick & easy handling

Every second counts, efficient and safe workflows are essential. Our parasols are quick and easy to operate, giving you more time for what truly matters. Our patented opening systems allow rapid opening and closing with just a few turns of the crank or using the tensioning lever.

Variety that inspires

Round or square, understated or colourful – with over 70 fabric designs, various frame colours and a uniquely wide range of sizes, you will find the parasol that perfectly complements your architecture and environment. Complemented by secure fixation solutions, practical extras and even impact protection around the mast.

Glatz concrete cube

Ideal for schools, nurseries and public spaces. Our new concrete cube combines stability with flexibility to offer a stylish yet practical solution for urban spaces:

- Multifunctional and relocatable fixation solution
- Seat made of spruce, colourless pressure-impregnated
- 1,100 kg total weight replaces the mechanical anchoring in the ground and guarantees the wind stability specified by Glatz for all parasol sizes up to Ø 600 / 550 × 550 cm

Glatz – your expert partner

For years, the Glatz project team has been committed to straightforward dialogue with national and international clients. We support architects, planners, interior designers, engineers, restaurateurs and hoteliers in selecting the ideal shading solution.

The Glatz product range impresses with its exceptional variety and offers a tailored solution for every situation.

Let us rethink your outdoor space together. We are happy to advise you personally – customised, solution-oriented and with an eye for every detail.
