400×400	-	8.8×14	16	18	220	305/285	62	287	220	100×100	310	40 (6)

The measurements specified are calculated average values and may differ slightly in the product ($\pm 2\% \pm 5$ cm).

The height measurements are based on the M4 ground socket. These deviate insignificantly between base versions.

The maximum permissible wind speed in accordance with the table applies for a horizontally positioned canopy and requires fixed anchorage to the ground.

For multiple parasols, a minimum distance of 20 cm between two parasols, as well as to walls, should be maintained.

Opening and closing using a battery-operated drill is not permitted.

8 parts

Loose cover max. 10 cm, concrete thickness
min. 30 cm (pay attention to frost depth),
Guarantee water drainage
