The listed measures represent extrapolated average values that may be slightly different on the product (± 2 % ± 5 cm).

Using PX ground socket with connecting tube leaves an additional 10.5 cm.

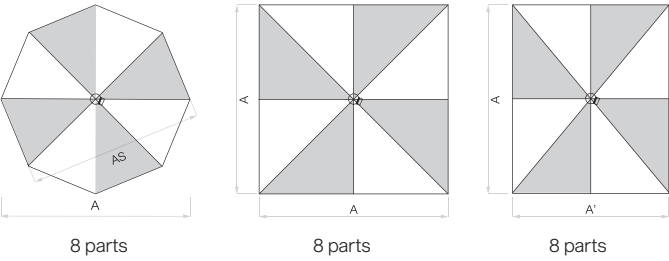

Height dimensions are based on ground socket M4. If one of the offered bases is used, these measures raise by 9.5–16 cm.

The max. wind speed limits as per our separate list apply only in the presence of a fix ground anchorage. A base with the specified minimum weight is not sufficient.

In the presence of several parasols, the minimum distance between one parasol and another and between parasols and walls shall be 20 cm.

Loose cover max. 10 cm, concrete thickness min. 30 cm (pay attention to frost depth), guarantee water drainage
